

Okechukwu (Junior) Agim

[Email](#) | +14432676389 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) |

Self-taught full-stack software engineer with 3+ years of hands-on development experience. Founded and launched a creator collaboration SaaS platform that acquired 100+ beta users. Experienced in building production applications with modern frameworks, API integrations, and AI-driven features.

Professional Experience

Corippl (ShadowAOI LLC)

[Remote](#) | [2023 - March 2026](#)

Founder and Full-stack Engineer

[Live Demo](#) | [Github Link](#)

- Started as a personal project in 2023 to learn full-stack development; registered as business and launched to beta users in April 2025
- Built and launched a creator collaboration SaaS platform with FastAPI/PostgreSQL backend, JWT/OAuth2 authentication, Stripe payment integration, and AWS S3 storage
- Built intelligent creator-matching system using spaCy and scikit-learn for content compatibility analysis, with responsive React and Tailwind CSS frontend
- Acquired 100+ beta users before sunseting platform in March 2026 to pursue new opportunities

Skinstric AI

[Remote](#) | [July - August 2026](#)

Frontend Engineer Intern (via Frontend Simplified)

[Live Demo](#) | [Github Link](#)

- Completed paid internship placement as part of intensive bootcamp program
- Architected responsive frontend interfaces using React and Tailwind CSS, integrating real-time API data flows for skin analysis detection and visualization
- Developed dynamic UI components and skincare recommendation cards with GSAP animations to enhance user engagement.

Projects (personal)

WriteFlow - AI Writing Platform

[Live Demo](#) | [Github Link](#)

- Built full-stack AI writing platform with FastAPI, PostgreSQL, and SQLAlchemy ORM for secure session management and relational data handling.
- Integrated real-time WebSockets for live AI feedback and developed React analytics dashboard with Recharts to track writing streaks and WPM metrics.

Technical Skills

Programming Languages: Python, JavaScript, HTML, CSS

Frameworks: React, Tailwind CSS, FastAPI

Tools & Other platforms: Vercel, GitHub, Vite, Figma, VsCode, Stripe, Git, WebSocket, JWT Authentication

Education:

Frontend Simplified Intensive Bootcamp

[June 2026 - August 2026](#)

- Completed 3-month self-paced full-stack development program with paid internship placement
- Focused on React, modern JavaScript, production deployment, and industry best practices

High School Diploma | Patterson Mill High School

[2011-2015](#)

Current Projects

Currently Building: React Native mobile application with Expo and Firebase for Shipaton 2026 competition.
